

# RITHESH KUMAR NYAMATHABAD

## Software Developer | B.Tech Computer Science Engineering (AI/ML)

Gujarat, India | nyamathabadrithesh18@gmail.com | github.com/nyamathabadrithesh18 | linkedin.com/in/rithesh-kumar-nyamathabad

### PROFESSIONAL SUMMARY

Enthusiastic Software Developer and Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning at Marwadi University. Solid foundation in object-oriented programming, data structures, algorithms, and modern web development. Experienced in building responsive full-stack applications, interactive systems, and practical AI-driven prototypes. Committed to clean code craftsmanship, collaborative problem-solving, and continuous learning.

### EDUCATION

#### Marwadi University

Gujarat, India | Expected 2026

Bachelor of Technology (B.Tech) — Computer Science and Engineering

Specialization: Artificial Intelligence & Machine Learning

### TECHNICAL SKILLS

|                    |                                                                                      |
|--------------------|--------------------------------------------------------------------------------------|
| Languages:         | Python, C++, C, JavaScript (ES6+), SQL, Java (Basics)                                |
| Web Technologies:  | React, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design, REST APIs              |
| AI & Data Science: | Machine Learning Fundamentals, Generative AI APIs, Prompt Engineering, DSA           |
| Developer Tools:   | Git, GitHub, VS Code, Google AI Studio, Vite, Linux Shell Environments               |
| Core Competencies: | Problem Solving, System Architecture, Object-Oriented Design, Algorithm Optimization |

### PROJECTS & SOFTWARE BUILDS

#### Ezy Bakery — E-Commerce Web Experience

React, JavaScript, Tailwind CSS, Vite

- Engineered a modern web storefront for neighborhood artisanal bakery ordering with dynamic catalog filtering.
- Implemented real-time basket calculations, dietary classification indicators, and custom celebration cake notes.
- Created a seamless mobile-first responsive layout with sub-second page transitions.

#### Campus Pulse AI — Academic Assistant & Dashboard

React, Python, Tailwind CSS, AI APIs

- Built an intelligent campus productivity dashboard consolidating student schedules, deadlines, and study modules.
- Integrated an AI study companion capable of contextual topic breakdowns and structured revision question generation.
- Designed high-contrast dark dashboard interface optimized for late-night university study sessions.

#### Hangman Interactive — Algorithmic Word Deduction Game

Python, React Web Port, Algorithms

- Developed a logic-driven interactive word deduction application with multi-difficulty tiers and hint algorithms.
- Built dynamic SVG gallows rendering responsive to mistake limits and strict input sanitization preventing duplicate guesses.
- Demonstrated state machine architecture, string manipulation, and algorithmic efficiency.

#### Stock Portfolio Tracker — Financial Software Utility

React, JavaScript, CSS Grid, Financial Math

- Created an investment portfolio analytics dashboard tracking equity weightings, asset allocations, and return metrics.
- Implemented automated profit/loss formulas, multi-currency support, and dynamic visualization widgets.

### CERTIFICATIONS & CONTINUOUS LEARNING

- Python & Computational Algorithms Certification — Focus on memory complexity and DSA (In Progress)
- Modern Web Development Architecture Bootcamp — Component lifecycle, responsive UI & state patterns
- Marwadi University Coding Challenges & Hackathons — Active competitive coding and team collaboration
- Open Source & Community Contributor — Regular commits on GitHub (@nyamathabadrithesh18)
